

Action plan submitted by UĞUR TAŞLI for SEYDİŞEHİR ŞEHİT MUHSİN KİREMİTÇİ FEN LİSESİ - 01.02.2021 @ 21:47:45

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.
- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.

Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › Your new users are given a standard password and are asked to generate their own password on their first

access. Passwords offer unique entry points into the school computing system and some basic rules of password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at www.esafetylabel.eu/group/community/safe-passwords.

Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access" password.

Software licensing

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › It is good practise that you are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.
- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

Policy

Acceptable Use Policy (AUP)

- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.
- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

Staff policy

- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.

Pupil practice/behaviour

- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.
- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

School presence online

- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetylabel.eu/group/community/school-policy.
- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

eSafety in the curriculum

- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.

Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.
- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.

Staff training

- › It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can

upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
